

XFUZION

XFuzion Finance Whitepaper v.2.3
March 2024

© 2024 by XFuzion.finance. All rights reserved.

■ XFuzion Finance

A cutting-edge token designed to fuse advanced tokenomics with unparalleled utility.

■ XFuzion Ecosystem

■ XFuzion Token

Invest in XFN with PLS as a store of value token. Simply buy and hold to enjoy reflections and witness increased value over time.

■ XFortune

Place your XFuzion tokens into the deposit pool for a chance to WIN! We burn 20% of XFN in each round to contribute to the token's sustainability.

With Xfortune, a total of 500 tickets are available for purchase. Once all tickets have been sold, the draw will commence, and winners will be selected using our random number generator. Prizes are awarded for matching numbers from 1 to the 6th, with the grand prize going to those who match all 6 numbers! XFN in and XFN out.

■ LendX

A community-driven initiative with zero fees. Truly a trustless, secure and a seamless project owned by the community.

You have the option to lend either 100 or 500 DAI into the LendX protocol, with a guaranteed 200% return **only** once your order is filled. This requires an initial investment of 100 DAI and 200 DAI to fulfill your order principle (after your initial 100 DAI lend). Please be aware that there are other lenders, and you may not be the next in line.

Future plans include redirecting fees from another part of the ecosystem back into LendX, ensuring lenders receive shared rewards while awaiting their 200% return.

■ Zapper

The Zap function provides users with an easy way to create their LP pairs. Simply own one of the pairs, and once enabled, it can effortlessly split those tokens 50/50 into your desired LP pair.

■ XFuzion Swap

You can effortlessly swap any token on the Pulsechain with minimal fees. Just remember to set a slippage of 12% when XFN is involved in the swap, as there is a 10% transaction fee integrated into its tokenomics.

■ The XFuzion advantage

Crystal-Clear:

Full insights into your financial journey.

Fort Knox Secure:

Our contracts pass rigorous audits, safeguarding every penny you trust us with.

Genuinely Decentralized:

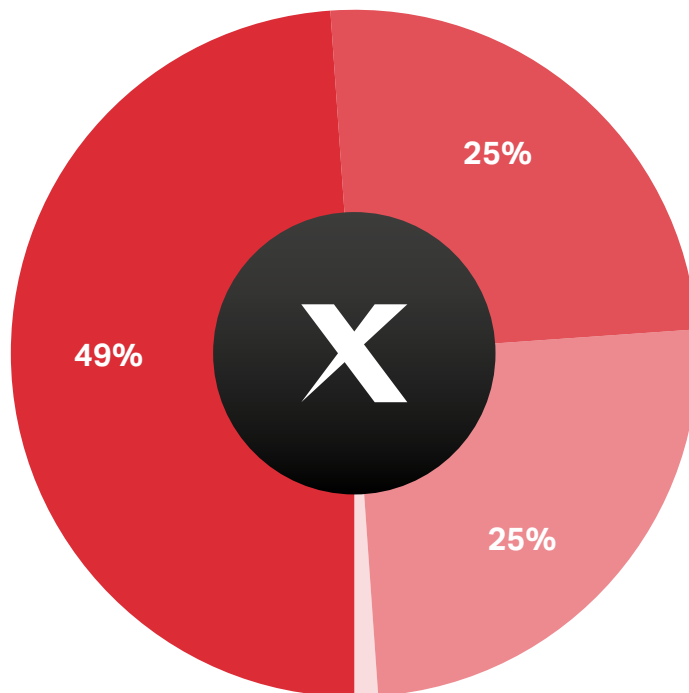

Ushering in a new era of equitable and open finance.
